DRM

On 10.9+, Chromium can use DRM with [Widevine](#) from Chrome

usage

- Download [latest Chrome](#)
- Copy `Google\ Chrome.app/Contents/Frameworks/Google\ Chrome\ Framework.framework/Libraries/WidevineCdm` to `Chromium.app/Contents/Frameworks/Chromium\ Framework.framework/Libraries`

```
# assume Chrome is at /Volumes/Google\ Chrome
# assume Chromium is at /Applications/Chromium.app
rsync -av "/Volumes/Google\ Chrome/Google\ Chrome.app/Contents/Frameworks/Go
```

on 10.9

Also need to install dummy libraries.

- Download [dummy libraries](#)
- Copy libraries to `/usr/lib`

```
# assume dummy libraries are at ~/Downloads/dummylibs/
sudo rsync -av ~/Downloads/dummylibs/*.dylib /usr/lib/
```

service list

working

- Netflix
- Amazon prime video (limited to SD on 10.9)

not working

- HBO Max
